PERSONAL PROFILE

I'm an 18 years old aspiring software developer passionate about programming and with a great desire to gain experience in the IT field by exploring a lot of different programming languages and technologies. Other than IT, one of my biggest passion is studying: I really like to challenge myself with always new knowledge to acquire, not only about IT but also in maths and physics for example, which for me are very interesting. Another passion of mine is training: I'll do it constantly, especially bodyweight training which is my favourite.
